

Class D Dry Powder

A UTC Fire & Security Company

For combustible metal fires

Badger's Class D Dry Powder Fire Extinguisher is ideal for addressing combustible metal fires involving metals like magnesium, sodium, potassium and sodium-potassium alloys.

Badger model WB570 contains a special blend of sodium chloride based dry powder extinguishing agent. When applied onto the high heat generated by combustible metal fires the agent crusts and effectively accomplishes extinguishment through a smothering action.

The extended soft flow applicator wand can be quickly detached to provide operators with longer discharge ranges when needed.

Features:

- Heavy-duty plated brass valves
- Stainless steel handles and levers
- Extended Soft Flow applicator wand
- Factory Mutual (FM) Approved
- Six year warranty
